"EACH DAY IS CHALLENGING. EACH DAY IS DIFFERENT. EACH DAY IS REWARDING..."

Lieutenant Brad Cunningham and Lieutenant Commander Nikhil Thakur
Engineers, U.S. Public Health Service Commissioned Corps

ENGINEERING OPPORTUNITIES IN THE U.S. PUBLIC HEALTH SERVICE!

"Being an engineer officer in the U.S. Public Health Service Commissioned Corps means we are on the front lines of public health. We're the officers overseeing the construction of health care and research complexes, designing and constructing water and sewerage systems for underserved populations, responding to natural disasters and other emergencies, conducting workplace safety research, managing environmental health risks, and designing safe buildings.

"We represent a wide variety of specializations, including chemical, electrical, mechanical, civil, biomedical, computer, and environmental engineering disciplines."
